

**INSTITUTE OF  
INTERNATIONAL  
MONETARY RESEARCH**

Analysis and insight into trends in money and banking,  
and their impact on the world's leading economies

## Mission Statement

The purpose of the Institute of International Monetary Research is to demonstrate and bring to public attention the strong relationship between the quantity of money on the one hand, and the levels of national income and expenditure on the other.

The Institute is heavily involved in the analysis of banking systems, particularly their role in the creation of new money balances. The relationships between money and national income/expenditure hold in all countries over long periods, and the Institute's research covers many countries. The "quantity theory of money" could be characterized as an "always-and-everywhere theory".

The Institute - which is associated with the University of Buckingham in England - was set up in 2014, in the aftermath of the Great Financial Crisis (a.k.a, "the Great Recession") of 2007 - 2009. It is an educational charity.

**INSTITUTE OF  
INTERNATIONAL  
MONETARY RESEARCH**

Analysis and insight into trends in money and banking,  
and their impact on the world's leading economies

## Is your research considering every angle?

Discover the impact of rates of broad money growth and macroeconomic outcomes with a tailored Executive Education Programme from the Institute of International Monetary Research.

As one of the few organisations that correctly predicted the current inflationary boom as far back as spring 2020, our programme is an invaluable tool for more informed decision-making.

### What we said

"At some point, probably by mid-or late-2021, the coronavirus crisis will be over ... I will be surprised if that does not lead to an inflation rate closer to 10%".

*IIMR report, 6th April 2020*

### What happened

US consumer price inflation rose from an annual rate of 1.5% in March 2020 to 9.1% in June 2022.

*Data from the US Bureau of Labor Statistics*

## Get in touch

To contact the IIMR or to join the mailing lists for our regular monetary updates, please email Gail Grimston at [enquiries@mv-pt.org](mailto:enquiries@mv-pt.org)

 @IIMR.Buckingham

 @iimr-buckingham

 @iimr\_buckingham

[www.mv-pt.org](http://www.mv-pt.org)

## Topics include

**Monetary policy and development**

**Inflation forecasting**

**Central bank communication**

**Monetary policy and its effect on financial stability**

**Money, inflation and nominal income**

## Flexible Delivery

The programmes are run at the Institute's premises at the University of Buckingham; or alternatively they can be delivered worldwide at the offices of your organisation.

The programmes are developed in full partnership with you; we work with you to design each level of the programme, customising it for different management levels. It can be run over 2-5 days.

If you have any questions about our bespoke programmes, get in touch to find out how the IIMR can deliver tailor-made corporate solutions for your organisation.

## Tailored to your organisation

### Taught by experts

The IIMR bespoke professional educational training programme on Money, Inflation, and Central Banking focuses on the relationship between trends in the growth of the quantity of money, broadly defined, and macroeconomic outcomes. This is something policy makers and mainstream economists have chosen to overlook, resulting in significant effects on asset prices and inflation.

The programme is taught by professionals and academics with many years of experience at a very high policy level, including advisors to Parliaments and Central Banks in different jurisdictions.

Our panel of experts include Tim Congdon (Chair, IIMR), Geoffrey Wood (University of Buckingham) and Forrest Capie (Bayes Business School) and other industry leading experts that make up our academic advisory council.

The course contents can be tailored to suit the specific needs, strategy, and challenges of your teams and organisation. We can also provide specialised teaching on monetary economics and monetary policy, risk management and financial institutions on the economies of particular countries, both developed and emerging.

The structure of the programme is flexible, but in general includes 3-4 hours of seminar sessions in the morning and discussion sessions in the afternoon.

### TARGETED

The course content can be tailored to focus on the economies of your choice

### CONVENIENT

Courses can be delivered at our premises in Buckingham or in your offices

### RESPECTED

Teaching is at a high level by professionals and academics with many years' experience

## Testimonial

'The research being produced by the Institute of International Monetary Research is of the highest quality, and it is timely. For me and my students at the Johns Hopkins University, the IIMR is a "go-to," invaluable resource'.

**Professor Steve Hanke,  
Johns Hopkins University**
